

Asset Leadership Network (ALN) Founding Members participated in the creation of the ISO 55000 Asset Management Systems Standard. More than 70 asset management professionals from 35 countries participated in the development of the ISO 55000 standards that were published in 2014.

As an Awareness Raising Organization, a main activity of the Asset Leadership Network is to increase the awareness of private industry, public organizations and government entities regarding the application and use of ISO 55000 to realize the value from their assets through managing risk and opportunity, in order to achieve the desired balance of cost, risk and performance in support of organizational goals

Since the ISO 55000 Standard Series was approved, Asset Leadership Network Founding Members have gained high-level government involvement with a Draft Executive Order, legislative activities, educational summits, and strategic meetings.
