

The Asset Leadership Network presents October 2020 Online October 2020 Online October 2020 Online

Rethinking the concept of value in national assets and infrastructure.

reStructuring America

Water and Wastewater

David Totman

VP of Asset Management, Innovyze 2019 President, ASCE Utility Engineering and Surveying Institute ASCE representative to US TAG ISO TC251/55000

Rethink What's Possible

"Reduce the life cycle cost of infrastructure by 50 percent by 2025 and foster the optimization of infrastructure investments for society."

"Do asset management..."

reStructuring America

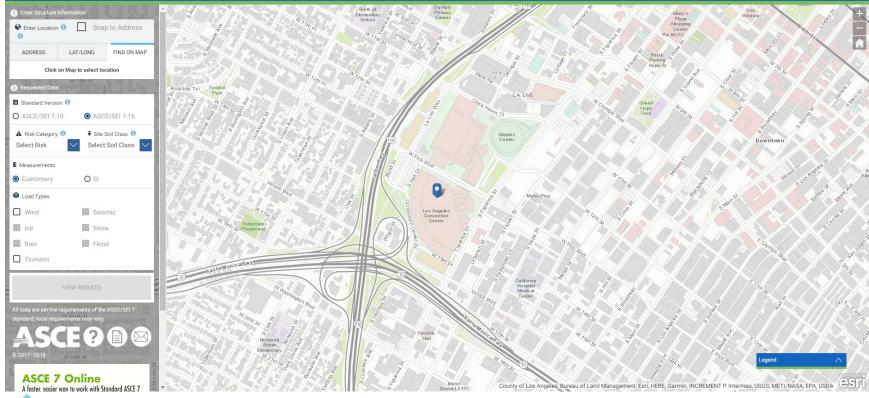

ASCE and ISO 55000 Effectively Enhance Reliable Improve Improve Grow **Stakeholder** Asset Business Decision Asset Manage Performance Value Risk Growth Making Confidence 11CW. 150/ 1505010 Just Teleastu. Protecting the Planet Guidance on the alignment of pancial and non-financial functions with Standards in asset management This Technical Specification is a guideline enabling organizations to better understand why and how alignment between financial and non-financial functions is important in realizing value from assets Multi-functional and multidisciplinary Asset Management is a function not exclusive to any one part of the organization but should be seen as multi-functional and multidisciplinary. Aligned financial planning, accounting, decision making and reporting are crucial aspects of effective asset management. Conversely asset management has major impacts on financial planning, reStructuring America
