Demystifying Standards

- › **Standards are the distilled wisdom of people who are experts**
 - » ISO Standards are – the best way to do things
 - » Want to Go Fast – Go Alone, Want to Go Far – Go Together
- › **Asset Management System Standards Promote Innovation**
 - » How to rapidly integrate new products and services
 - » Help you be agile and resilient
 - » How to manage and leverage change
- › **Asset Management System Standards**
 - » Improve Performance, Reliability and Resiliency
 - » Reduce Risk and Uncertainty
 - » Generate Value >>> **About Value and Not About Assets...**

Demystifying Standards

› Asset Management System Standards:

- » Focus on Objectives and the Strategies to Achieve Objectives
- » Integrate Policy and Process
- » Streamline and Organize Activity and Workflows
- » Create Performance Feedback Loops > Continual Improvement

› To Implement Asset Management System Standards:

- » Understand / Accept a Systems Approach
- » Establish and Use a Systems Approach
 - » Define the Purpose of the Asset Management System > Context
 - » Make Use of Objectives as Prime Motivators... Basis for Performance
 - » Implement and Deploy ... And Use the Asset Management System
 - » Operate and Sustain > Managing Change and Continual Improvement

Thank You
