

# ISO 55000 Training and Certification

Lindsay Ziegler

The Andrew James Advisory Group

# Certification types

- There are two types of certification to ISO 55000: individual and organizational
- The ALN's A55K Professional Certification designation certifies that an individual has the knowledge to participate in and contribute to ISO 55K Asset Management efforts
- Andrew James Advisory Group provides training that qualifies an individual to sit for the A55K exam
- Other certifications are available that are more focused on asset management activities such as maintenance and engineering

# Current Status

- ISO 55000 is gaining momentum
  - In Federal government agencies
  - In consulting and software firms with government contracts
- Professional training and certification is also gaining as a result
  - There are currently over 70 individuals holding the A55K Professional Certification
  - In 2020 alone, Andrew James Advisory Group (AJAG) has trained 50 individuals in 3 firms, all of whom have achieved ALN A55K certification
  - One firm, LMI, has 46 certified practitioners so far, and is establishing an ISO 55000 community of practice

# AJAG Course Offerings

- AJAG provides courses in both on-site and remote formats
- Currently offering only remote format due to COVID-19
- Course offerings include:
  - Full ISO 55K / A55K training course – 4 day on-site or 2 week online format
  - Executive overview, in either pre-recorded or webinar format
  - One-day ISO 55K summary course
- Four-day on-site course also offered in Spanish through Ortiz-Ruiz Consultores

# Course Content and Structure

- The A55K Professional Certification course materials were primarily developed by a member of the original ISO 55000 creation team, Jim Dieter
- It is the only course currently available that focuses on the strategic and tactical nature of the ISO 55K standards
- The course covers the 3 principal standards: 55000, 55001 and 55002
  - The 00 and 01 standards are covered in depth
  - We provide an overview of 02, because it's primarily reference material on guidance and best practices
  - No outside materials are included in the course or exam
- The exam is completely independent of the course – we don't "teach to the exam", we teach the standard

# Online Course

- The online course is offered through the Moodle learning platform
- The course format includes:
  - Prerecorded lectures
  - Online exercises and quizzes
  - Live instructor-led discussions
  - Preparation of a Strategic Asset Management Plan linked to an asset management case study
  - Instructor availability during posted office hours
  - Individual copies of slides for students to retain

# Why train with Andrew James Advisory Group?

- First organization to have training accredited by the ALN
- 99% pass rate
- Access to leadership, strategy, and industry experts
- Our CBT-Hybrid course allows for the flexibility of on-line training with live access to our instructors and experts
  - Special Topics including Federal Real Property, Data Management and Governance, Leadership, Change Management

# LEARNING PLATFORM

# Course Feedback

- “I just want to say I appreciate the course, I found that it enhanced my skills and knowledge and ability, to include my career.”
- “I enjoyed it! Particularly the group project and finished SAMP. It was revealing.”
- “I've enjoyed the training, your discussions, and the group work was intense but fun!”
- “You did a great job guiding us through it.”

# What's Next

- Next class planned for November 9 - 20
