The Asset Leadership Network would like to recognize the sponsor and co-sponsors of the Savings, Accountability, Value, and Efficiency Act of 2015, H.R. Bill 614 – popularly known as the SAVE Act with an Asset Leadership Impact Award for Asset Legislation Innovation.

The SAVE Act's first provision, Section 101, deserves special recognition for requiring refinement in Management of Federal Excess and Underutilized Real Property. This Section outlines the principals of best practice asset management strategies as stated in the ISO 55000 asset management standard and supported by the Asset Leadership Network.

These asset management attributes include: requirement of statement of purpose; definitions of assets; establishment of performance measurement and reporting goals.

Other attributes of the SAVE Act that map to internationally accepted asset management standards include: Naming of responsible parties; Creation of Integration and Implementation Plans; and, requirement for scheduled assessment of success and suggestions for improvement.

The responsible parties named in the SAVE Act are the Director of the Office of Management and Budget and the heads of Federal Agencies. This requirement is aligned with ISO 55000 asset management standard Section 5: Leadership.

The SAVE Act also requires effective data collection and management in a manner that is compliant with ISO 55000 asset management standard section 7.5: Information Requirements.

The Asset Leadership Network understands that other elements of the SAVE Act also align with the ISO 55000 asset management standard in a way that will help save Federal Taxpayer resources through improved business standards.

The Save Act Sponsor and Co-Sponsors have demonstrated innovation in calling for a methodical approach to Federal excess and real property. Establishment of asset management methods based on the SAVE Act are seen by the Asset Leadership Network as critical in saving U.S. taxpayer resources and maximizing the value of the Federal excess and real property.

For these reasons, the Asset Leadership Network is please to recognize the SAVE Act with the 2015 Asset Leadership Impact Award for Asset Legislation Innovation.
